Objective

Aspiring Software Developer with a strong foundation in full-stack development, DevOps practices, and UI/UX design. Experienced in building scalable web applications and managing the software development lifecycle. Adept at leveraging technical and communication skills to deliver innovative solutions and enhance team collaboration and seeking to contribute to dynamic engineering teams.

Work Experience

Software Developer

Ringbelt Real Estate Company – Nyeri, Kenya

September 2024 – December 2024

- Designed and implemented a **Property Management System**, replacing the company's manual record-keeping process and Excel-based tracking.
 - **Frontend**: Developed responsive and user-friendly interfaces using React and Next.js to enhance user engagement and streamline workflows.
 - **Backend**: Created secure RESTful APIs with Flask and managed MySQL databases to centralize and digitize property records.
 - **DevOps**: Configured CI/CD pipelines using GitHub Actions to automate testing and ensure seamless deployments.
 - **Impact**: Reduced manual operations by 60% and improved data accuracy by migrating over 5 years of property records into the new system, increasing operational efficiency for property managers.
-

Education

Moringa School – Software Engineering

Expected November 2024

ALX KENYA – A.I. Essentials Certification

Expected October 2024

Karima Boys High School

Kenya Certificate of Secondary Education
